Introduction

A popular quote by the American science fiction author Frank Herbert is “Law is the ultimate science” in his book Dune. In the infinite loop of catching up between legal framework and technological leaps, social transformations happen influenced by scientific innovations and get promoted or restricted by legal sanctions hereon.

In the current techno-legal context, can be it surely ascertained that social transformations due to scientific innovations and technological leaps? Or in actuality the credits belong to the legal domain? Does law have the same objectivity and neutrality that science boosts? This essay competition is to explore the possibilities of the question whether law is the ultimate science.

About the School

The School for Law and Technology (SLT) explores the legal, ethical, and policy implications of new and emerging technologies to provide a forum for informed debate and analysis of interdisciplinary aspects. The primary areas of focus for the SLT includes intellectual property, privacy & data protection, cybersecurity, digital commerce, artificial intelligence and policy impact on trade, commerce and society.

SLT facilitates a platform to contribute towards policy inputs, impact study of legislations to facilitate incisive public debate on the focus areas. The prime objectives of the School are mainly to facilitate public discourse and informed debate on technology-related issues. It also aims to provide a platform for jurisprudential and empirical research relating to technology and its impact on the society at large by advocacy inputs.

About the Centre For Law and Sciences (CLS)

The Centre for Law and Sciences at HNLU, Raipur was established, in the year 2023, with an objective to develop research, teaching and advocacy in Law and its interface with science advances, innovation and technology. The Centre also aims to focus on promotion of interdisciplinary research and analysis on legal, ethical, and policy implications of new scientific developments and emerging technologies. The Center seeks to provide a platform for research relating to scientific advancements and its impact on the society at large by advocacy inputs.
